**To whom it may concern:**

We are the company responsible for installing and maintaining the Medi-Shower system in St James Hospital, James's Street, Dublin 8.

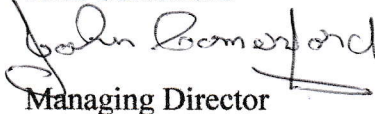

We have found the Medi-Shower system to be clearly more hygienic than the traditional descale and cleaning system used prior to the installation of the Medi-Shower system.

I speak from experience as I was the Plumbing Services Officer in St James Hospital for more than thirty years before forming my own above company.

The Medi-Shower system was first installed in St James Hospital three years ago and has proven very successful in meeting all the hygiene levels required by infection control. There have been no bacterial issues resulting from our regular testing program. Indeed St James is installing this system in their hospitals expansion program. The hospital's policy is to change the colour coded inserts quarterly in standard wards and monthly in high dependency areas, while the silver impregnated hoses and shower handles are monitored over the 5 year product lifetime.

We find the Medi-Shower system to be an excellent product easily installed and maintained.

John Comerford

  
Managing Director
